# The SANDVIK DURA Disk™ II Stump Cutting System

Available For Any Tow-behind, Self-propelled, or Other Stump Grinding Application

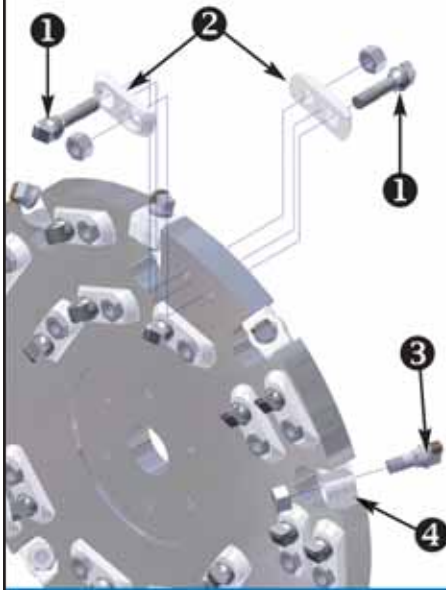

## THE DURA DISK ADVANTAGE

### INCREASE PRODUCTION - CONTROL COSTS

- Up to 50% increases in productivity, due to higher cutting efficiency
- Smoother cutting action, lower induced vibration
- Less chip spread
- Longer tool life
- Larger thicker carbide for durability
- Harder carbide to hold cutting edge longer
- **No bolts to shear • No rights or lefts • No gaging**
- Replace any tool independently with 15/16 socket
- Tools and pockets can be moved to opposite side for additional usage and uniform wear
- There are only two types of teeth used on the disk

## Cutting System Components

### 1 Long Plow Bolt Bit

The same Long Plow Bolt Bit is used on both sides of the disk. This simplifies tool replacement and enables you to move a worn bit to the other side of the disk for additional use. The use of thicker harder carbide tips, increase durability and wear resistance. This keeps tools sharper longer.

### 2 Long Plow Bolt Bit Pocket

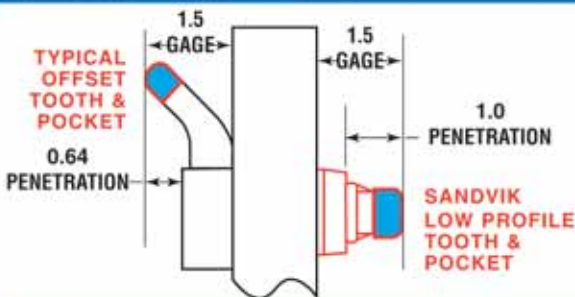

The same plow bolt bit pocket is used on both sides of the disk. This simplifies tool replacement and enables you to move a worn pocket to the other side of the disk for additional use. The plow bolt design of the bit and pocket index the bits automatically and prevent rotation.

### 3 Short Plow Bolt Bit

The short plow bolt bit utilizes the same features as the long plow bolt bit (see item #1).

### 4 Short Plow Bolt Bit Pocket

The short plow bolt pocket provides automatic positioning and gaging for the short plow bolt bit.

### DURA DISK LOW PROFILE DESIGN

- Increases efficiency by as much as 50%
- Reduces wheel and pocket rub
- Loads and stresses are reduced on teeth and pockets
- Smoother cutting w/less vibration
- No bolt to shear
- No elongating of mounting holes

## KODIAK KUTTERS

2811 WATTERSON TRAIL  
LOUISVILLE, KY 40299  
info@dolealesinc.com

Finally a compact mulcher with the horse power you want and need to stay ahead of the competition. Since 1999 Kodiak Cutters has manufactured the Beaver "B425" with the most innovative mechanical drive system on the market. This system has shown itself to be extremely productive and reliable even in the most rugged conditions where terrain and temperature are your biggest obstacles.

- Cummins QSB 160H.P. 6 cylinder engine
- Two year field proven design
- Simple mechanical driven head for powerful and efficient operation.
- Torque converter between engine and mower to protect drive train and ease operation
- High capacity radiator with swing out oil cooler for easy cleaning
- 35-gallon fuel capacity
- 35-gallon hydraulic oil capacity
- All components sourced in the USA for ease of maintenance
- 15-GPM accessory pump
- Easy access to all general maintenance points (filters, fluid fill, fluid check, etc)
- Large cab with great visibility and two doors for greater convenience
- All steel undercarriage for the most sever conditions available with single or triple grousers
- 2-speed final drives
- Pilot operated proportional joystick controls
- Under 5psi ground pressure
- 13,900 lbs total weight with head

# BIGGER TOYS for BIGGER BOYS

**INTRODUCING!  
75' WORKING  
HEIGHT**

Mat Jr. knows the MAT-TREE has what it takes to beat down those "6 year" rigs. Its packed with innovative features and quality construction—standard. Call your rep today and see for yourself.

- Innovative telescopic upper boom
- Solid boom construction – not pipe construction like our competitors
- Amazing horizontal reach of 48 feet at 30 feet above ground
- Non-over center design for greater stability
- No chains or cable for boom actuation
- Working height up to 75 feet
- Bearing ring with 3 ft. diameter, 360° rotation for smooth operation
- Meets new ANSI A92.2-2001 standard
- Platform capacity of 350 lbs.
- Stowed height like a 52 ft. machine
- Unique patented hydraulic platform leveling system

**MAT-3 Inc.**
